PROFESSIONAL EXPERIENCE

Sr. Executive, Data Analyst

Nov 2024 – Present

Leap India Limited, Mumbai, Maharashtra

- Rebuilt the team's manual Excel reporting into automated Power BI, Tableau, and SAC dashboards. Saved about **12 hours a week**. Ops managers across regions open them every morning.
- Cleaned and validated **20,000+ rows** of operational data in SQL and Power Query, fixing mismatches between source systems. Data errors dropped about **40%**.
- Tracked OTIF, OFR, and efficiency on those dashboards. Ops metrics improved about **30%** once teams could watch the numbers daily.
- Built SAP Datasphere to MySQL pipelines with Star Schema models so the BI layer handled heavier queries. Set up Sales, Logistics, and Finance data marts teams now query themselves.
- Executed **400+ UAT** test cases during the SAP S/4HANA cutover, all passed. Mapped data fields between the old and new systems.
- Advanced from Management Trainee to Sr. Executive within about **6 months**.
- Accelerate SQL and DAX work about **20%** with ChatGPT, Claude, and GitHub Copilot.
- Produced monthly P&L summaries, variance reports, and cashflow tracking in Excel with VBA macros and Power Query for finance.
- Wrote the dashboard SOPs, trained the team, and onboarded new hires on our data tools.
- Present numbers in weekly and monthly management reviews. Flag anything that looks off and turn business questions into the data pulls people need.

Research Contributor, Data Analytics

Aug 2020 – Aug 2021

Indian Institute of Technology (IIT) Delhi

- Cleaned about **10,000** chest X-ray records in Pandas and NumPy for a lung disease study, and co-designed a COVID-19 survey.
