

SOUMYA GUPTA

Data Analyst | Risk & Business Analytics | Fraud Detection | SQL | Python | Power BI | Tableau

+91-76749-81551 • soumya1698@gmail.com • Mumbai, Maharashtra • linkedin.com/in/soumya-gupta1698

PROFESSIONAL SUMMARY

Results-driven Data Analyst with **almost 2 years of professional experience** across SQL, Python, and BI platforms — detecting fraud patterns and anomalies, building measurement frameworks, and translating data into actionable business decisions. Proficient in SQL (CTEs, Window Functions), Python (Pandas, NumPy), Power BI (DAX), Tableau, SAP Analytics Cloud, and Excel / Google Sheets. Delivered fraud-pattern detection pipelines, automated alerting dashboards, ETL-based data integrity frameworks, and cross-functional KPI systems — enabling a **30% efficiency gain**, **40% data quality improvement**, and **12+ hrs/week** reporting savings.

TECHNICAL SKILLS

Core Competencies: Data Analysis, Data Visualization, Dashboard Development, Business Intelligence, Fraud Detection, Trust & Safety, Risk Analytics, Anomaly Detection, Pattern Recognition, Measurement Framework, KPI Tracking, Stakeholder Management, Data Reporting

BI, SQL & Data: SAP Analytics Cloud (SAC), Power BI (DAX, Power Query), Tableau, Looker, KPI Design, SQL (CTEs, Window Functions, Joins), MySQL, HQL / Hive (working knowledge), SAP Datasphere, Excel (Pivot, XLOOKUP, Power Query, Macros), Google Sheets, OData, MIS Reporting

Data Engineering & Warehousing: ETL, Data Pipelines, Data Warehousing, Star Schema / Snowflake Schema, Fact & Dimension Tables, Data Modelling, Data Quality Management, Data Governance, Data Lineage, Data Validation

Analytics, AI & Programming: Python (Pandas, NumPy, Matplotlib, Seaborn), EDA, Statistical Analysis, Outlier Detection, Behavioral Pattern Analysis, Conversion Analytics, Funnel Analysis, Variance Analysis, Descriptive & Diagnostic Analytics | ChatGPT/Claude, GitHub Copilot, Generative AI

ERP, BA & Domain: SAP S/4HANA (MM & SD), Z-code Testing, UAT | BRD, FRD, User Stories, Gap Analysis, Root Cause Analysis, Risk Mitigation, Agile, Scrum, SDLC | Supply Chain (S&OP, Demand Planning), Logistics, Finance (P&L, Variance Analysis), FMCG | JIRA, Confluence, MS Teams, Lucidchart

PROFESSIONAL EXPERIENCE

Sr. Executive — Data Analyst & Business Analyst

Nov 2024 – Present

Leap India Limited, Mumbai, Maharashtra

- **Promoted** from Management Trainee to Sr. Executive within **6 months** of joining, recognised for consistent delivery of data-driven insights across Supply Chain and Finance functions.
- Boosted operational efficiency by **30%** by designing end-to-end measurement frameworks and KPI monitoring systems with automated threshold-based alerts in SAP Analytics Cloud and Excel — enabling real-time fraud/abuse signal detection and leadership decision-making.
- Identified irregular behavioral patterns and anomalies across operational datasets using SQL window functions and Python EDA — supporting fraud-hypothesis testing, root-cause analysis, and cross-functional risk mitigation.
- Eliminated **12+ hours/week** of manual reporting by building automated SAC and Tableau dashboards with proactive alerting, drill-down filters, and daily/weekly/monthly KPI views — enabling preemptive business actions and replacing ad-hoc workflows.
- Engineered OData-to-MySQL data ingestion workflows from SAP Datasphere — applied dimensional modelling and indexing to cut Power BI report refresh time and improve query performance at scale.
- Published conclusive business intelligence across Tableau and Power BI, integrating MySQL data marts — enabling Business, Product, and Data Engineering teams to track conversion metrics, business health KPIs, and self-serve on demand.
- Improved data quality by **40%** by building an ETL-based cleaning pipeline on **20,000+ rows** using SQL and Excel Power Query — applied outlier detection, data integrity checks, and instrumentation quality feedback loops with Data Engineering to surface and remediate anomalous records at source.
- Accelerated analytical delivery by embedding AI-native tools (**ChatGPT / Claude, GitHub Copilot / Cursor**) for SQL drafting, DAX generation & root-cause decomposition — cutting cycle time by **~20%**.

Data Analytics Research Contributor

Aug 2020 – Aug 2021

Collaborative Research Project, Delhi

- Built an end-to-end ML data pipeline for lung disease detection — performed data extraction, cleaning, and transformation on **10,000+ chest X-ray records** (Pandas, NumPy, scikit-learn), and co-designed a COVID-19 public health survey data framework with PhD researchers.

EDUCATION

UPSC Civil Services Exam — Research & Analytical Study

Nov 2021 – Aug 2024

Developed policy data analysis, statistical interpretation, research synthesis, and structured analytical writing across Economics, Statistics, and Public Policy.

Bachelor of Technology (B.Tech)

2016 – 2020

Gandhi Institute of Technology and Management (GITAM), Visakhapatnam

CGPA: 7.4 / 10.0

CERTIFICATIONS & TRAINING

SAP Datasphere BDC — Comprehensive Training — Udemy

Feb 2026 – Present (In Progress)

Data Analytics & Data Science Program — Coding Ninjas

Sep 2024 – Sep 2025

Red Hat Certified System Administrator (RHCSA) — Red Hat

Jun 2018
